the second edition of respiratory physiotherapy formerly emergency physiotherapy continues to be a highly accessible and convenient guide which brings the insight of clinical experts in the field to the fingertips of the busy physiotherapist who are often exposed to challenging and stressful situations. Beverley Harden is now joined by a team of 5 additional editors and the new edition has been completely revamped. It looks at assessment, management of and calls to specific areas while presenting key information in tables, bullets and summaries for quick reference on the ward. Case studies that cover common emergency situations, self-assessment questions which offer the reader verification of their comprehension and clinical reasoning skills, a z of treatment techniques, appendices including normal values and common drugs used in critical care areas so that essential information is always at hand.

Trauma is a serious public health problem worldwide and is the leading cause of death among adults and children. Physiotherapists play a key role in the interdisciplinary team caring for patients with physical injury after a traumatic event. *Cardiopulmonary Physiotherapy in Trauma* offers valuable insight into the advanced trauma life support and acute care management of patients with trauma-related injuries as well as physiotherapy treatment aims, intervention strategies and precautions. A variety of topics related to trauma are brought together in this practical volume which shares information obtained from published research as well as the extensive clinical expertise of the authors. The dissemination of the authors' personal experience is key in cases where evidence to support the use of certain treatment techniques in patients with traumatic injury is still lacking. The book is thus an essential reference that encourages evidence-based practice for advanced undergraduate students as well as graduate physiotherapists who work with trauma patients in the acute care setting.

The fifth edition of this seminal textbook continues to provide those who are studying or are in practice with comprehensive evidence-based coverage of all the main aspects of respiratory and cardiac physiotherapy throughout the whole lifespan: neonates, infants, children, adolescents and adults, with the patient at centre and advocating a problem-based approach. For the new edition, Jennifer Pryor and Ammani Prasad hand the baton of editorship and their lasting legacy over to Eleanor Main and Linda Denehy with a team of over 60 international expert authors. The new editors have incorporated major changes reflecting current cardiorespiratory physiotherapy education and practice. These changes are heralded by a new title: *Cardiorespiratory Physiotherapy: Adults and Paediatrics*, formerly *Physiotherapy for Respiratory and Cardiac Problems: Adults and Paediatrics*, and a significant restructure of the content with a new set of chapters. A new key chapter on anatomy and physiology of the respiratory system lays the foundation which is then followed by a chapter on clinical assessment of adults, infants and children and acutely ill or deteriorating patients. Additional new content includes a chapter on outcome measurement in practice and a large chapter describing rehabilitation in acute and chronic conditions in special populations including spinal cord injury, oncology, trauma and paediatrics. The chapter on therapeutic interventions is comprehensive and reflective of evidence.
